

LESSON 1: STRUMMING FUNDAMENTALS

LESSON 1:

Strumming Fundamentals

In This Lesson...

In this lesson we'll cover some basics of strumming and how they are written and executed.

Example 1-1

Example 1-2

I use the syllables a lot of times like "quar-ter" for a quarter note and "eighth note" for an eighth not pair. As long as you say things in time, you'll play them in time.

Example 1-3

Example 1-4

Example 1-5

Sometimes we'll extend things out the other way.

In that case, if you double a quarter note you have a half note. Yes, you really do miss the strings 3 times if you do one of these.

Remember for these that every beat=2 strums (a down strum and an up strum.) By doing that you let your right arm keep the time for you.
